

Power up 20% flywheel 247Kw*

Torque up 28%

ECUTEK

No MODS JUST POWER

Re-tune your car with DELTA ECU and get more power and more torque without the need for engine modifications, the proof is in the dyno sheet. *STi Tek2Vs. Standard, no other modifications. Dyno test carried out in two wheel drive mode measured at wheels.

Benefits:

- No alteration to your vehicle's equipment. (No wiring mods, etc)
- Car dealers can still 'interrogate' your car's ECU.
- Maintains standard appearance.
- Fully reversible.
- Suits all Turbo Impreza models, WRX, GT, STi, MY99 to current (refer to web site).
