**If you miss the warnings...
...ROAD ANGEL won't.**

ROAD ANGEL
GUARDING YOUR LIFE AND LICENCE

ROAD ANGEL™

GUARDING YOUR LIFE AND LICENCE

As our roads become busier, more congested and more regulated, driving skillfully and safely becomes ever more challenging.

Staying alert to traffic conditions and road hazards throughout your journey is a must.

Even the most conscientious driver can have a momentary lapse in concentration which could easily lead to an accident or a fine and points.

ROAD ANGEL has been specifically designed to rapidly provide you with critical information to enhance the safety of your journey. Using the latest satellite navigation technology, ROAD ANGEL knows your position and provides you with an audible and visible warning of the approaching danger spots and a speed check.

ROAD ANGEL – rapid, clear warning of approaching hazards

On approaching a danger zone, ROAD ANGEL emits an audible beep and the display turns red, and the first proximity bar lights up. As the danger zone comes closer, the proximity bars increase and the audible beep increases in frequency. Your speed continues to be displayed.

At the danger spot, the five proximity bars are shown and the beep is rapid. ROAD ANGEL reverts to normal display as soon as the danger spot is passed.

ROAD ANGEL – comprehensive database

Capable of storing up to 50,000 unique sites, your ROAD ANGEL is pre-programmed with all the latest data.

Updated continuously by Blackspot site verification teams and other ROAD ANGEL users, the central database can also be easily personalised to include information specific to you.

ROAD ANGEL – no false alerts

Programmed to respond only to danger in your direction of travel, the unit avoids responding to hazards on nearby routes.

ROAD ANGEL – simple and effective

Easy to install, designed to provide all the information at a glance, portable and robust, ROAD ANGEL will rapidly become a valued companion on every journey.

Personal protection for you and your passengers from:

- **Accident blackspots:**
Accident areas as designated by the authorities
- **Red light cameras**
- **Fixed speed cameras**
- **Average speed cameras**
- **Designated school safety zones**
- **Country towns on major highways**
where speed limits drop from 110 to 60kph (or lower)
- **Your own personally stored locations**
Just press the STORE button to enter your own location
