22b and WRC type Wings

Available: Fibreglass OR Fibreglass with Clear coated Top wing made of CARBON FIBRE

Also see Group A wing AND 22b Adjustable wing. ALL PICS ON WEB SITE (above)

Real Carbon fibre

Carbon Top wing available

WRC type wing

Benefits:

Based on the successful design as used by Prodrive on the famous World Rally Cars, this wing not only looks GREAT but actually works.

Cars fitted with this wing will be more stable at speeds where the aerodynamic effects of the wing really take effect.

Unlike the latest STi Ver 5 wing, this wing is stronger and has more down force.

Features:

- Simple installation
- Fits to existing bootlid mounts
- Includes built in stop light
- Available ready to paint
- Also available with Real Carbon Fibre top wing that needs NO paint

Real 22b Adjustable wings in stock

MRT Performance. For Subaru, Daihatsu & Honda.

MoTeC / Haltech and factory EFI Specialists
